

## Notice Regarding the Acquisition of Shares in Eisenmann GmbH (Germany) through Daifuku Co., Ltd. (Japan)

Eisenmann GmbH hereby announces that Daifuku Co., Ltd. (Japan) will acquire 100% of the shares of Eisenmann GmbH from its current shareholder Nimbus Hands-on Investors (Netherlands).

Based on its long-term vision, “Driving Innovative Impact 2030,” the Daifuku Group is working to expand its business operations outside Japan and strengthen its competitiveness.

The acquisition of Eisenmann will strengthen the Group’s core business of manufacturing systems for the automotive industry. By acquiring Eisenmann’s shares, Daifuku gains the ability to offer even more comprehensive coverage in automotive and industrial manufacturing, especially in the field of painting – from quotation and planning through commissioning and after-sales support – tailored to European standards and customer-specific requirements, which is becoming increasingly important. Daifuku and Eisenmann have therefore decided to join forces and integrate Eisenmann into the Daifuku Group in order to strengthen and expand their capabilities in the field of system solutions worldwide.

Eisenmann offers innovative automation technologies as well as proprietary, sustainable and economical solutions in the field of painting and final assembly, which are mainly used by European manufacturers of automotive and industrial components. Daifuku, on the other hand, has a strong global presence, a broad product and solution portfolio, in-depth expertise in project execution, and a very strong research and development team. The business areas of Eisenmann and Daifuku complement each other perfectly, particularly in the field of industrial painting and surface treatment systems.

Through this acquisition, Daifuku as well as Eisenmann expect to enhance their proposal capabilities and expand integrated offerings in the automotive production line systems field, leading to increased value provided to customers and expanded order opportunities.

The current Eisenmann management team will remain in place and Eisenmann’s corporate culture, the existing business contacts, and our customer centric approach will remain unchanged.

As of today, the transaction is expected to close in the second quarter of 2026.

### **About Eisenmann:**

Eisenmann GmbH is an internationally active technology company in the field of plant engineering, specializing in industrial painting systems, conveyor technology, and process-oriented solutions for efficient, sustainable production. Since its reestablishment in 2020, Eisenmann has been developing innovative system concepts and services for customers worldwide, drawing on established technologies and extensive expertise.

Eisenmann employs over 280 people worldwide and is represented in 6 countries with local entities.

In fiscal year 2024, the Eisenmann Group generated total output of EUR 87.7 million and is expected to exceed a total output of EUR 100 million in fiscal year 2025.

### **About Daifuku:**

Since its establishment in 1937, Daifuku has pursued the streamlining of logistics and production sites based on its core material handling technology. The Daifuku Group provides systems for a wide range of industries from its production and sales bases in 24 countries and regions worldwide, with systems for automobile production lines representing one of its core businesses. In recent years, as material handling systems have increasingly been expected to play a vital role as social infrastructure, the Daifuku Group continues to develop next-generation logistics and production streamlining systems and contributes to the development of society.
